Soft Skills: Communication, Critical thinking, Presentation, Attention to Detail, Time Management

EDUCATION

Masters in Business Analytics — **Feb 2025 - Oct 2026**

Deakin University, Burwood, Melbourne

Bachelors of Electronics & Communication (CGPA : 7.8) — **Aug 2018 - July 2022**

Christ College of Engineering, Irinjalakuda, India

PROFESSIONAL EXPERIENCE

Business Analyst Intern — **Oct 2026 - Current**

TechTitans Software Solutions, Melbourne

- Conducting market research and competitor and pricing analysis to inform product positioning in the Australian SME software market.
- Planning customer discovery, including target-segment evaluation and structured stakeholder interview design.
- Performing business and requirements analysis, maintaining traceability between stakeholder needs and business requirements.
- Supporting agile delivery through backlog management, decision logging and risk identification.

Business Analyst/Developer — **June 2023 - Oct 2024**

TATA Consultancy Services

- Acted as the main liaison between the client, project manager, developers and QA testers, keeping requirements and priorities aligned across the team.
- Gathered and clarified stakeholder requirements, translated them into prioritised development tasks, and validated delivered features against acceptance criteria before handover to testing.
- Developed and maintained front-end web applications in Angular and TypeScript.
- Participated in code reviews, debugging and sprint ceremonies, contributing to faster defect resolution and more predictable release timelines.

IT Support Intern **Aug 2022 - May 2023**

Edentu Dental App

- Administered the app admin interface and sales app, and supported the design and rollout of educational software features.
- Ran daily scrum calls to track progress, surface blockers and align the team; scheduled daily tasks and tracked timelines to keep milestones on schedule.

PROJECTS

Integration of Retail POS & ERP Systems into a Dimensional Data Warehouse **June 2026 - Sept 2026**

- Responsible for dimensional data modelling, ETL pipeline development and analytical insight generation.
- Built ETL pipelines in Pentaho to extract, cleanse and load 95,000+ records across 13 source datasets resolving surrogate keys and computing revenue, cost and margin at line item grain in MySQL. Used SCD Type 2 to preserve customer, store and product history at the time of each transaction.

Analytics Tools Used: MySQL, Pentaho Data Integration, Microsoft PowerPoint.

World Vision Australia : Deakin University Capstone **March 2026 - May 2026**

- Owned data modelling, DAX development and analytical storytelling for a donor-attrition analysis across 6 integrated datasets (61K+ supporters, 1.9M donations, 966K+ communication events).
- Built a star schema and DAX measures in Power BI to classify donors and measure how communication exposure relates to retention and used Python for EDA.
- Delivered 3 data driven recommendations to improve donor retention and engagement.

Analytics Tools Used: *Python,* Microsoft Power BI, DAX, Microsoft Excel, Microsoft PowerPoint.
